**Durable Water Repellency** The outer fabric is treated with a water repellant hydrophobic coating which forces water to bead up and roll off the surface of the fabric. It extends the saturation point of the fabric and allows you to stay comfortable and in the field longer.

**RainBlocker® Technology** Waterproof, windproof, breathable technology which is impermeable to outside moisture, while allowing perspiration from the inside and dispersing it through the membrane system. Garment seams are heat sealed and secured with waterproof tape.

**S3™ Silver Anti-Microbial Technology** S3 products utilize antimicrobial technology which helps to inhibit the growth of odor causing bacteria. S3 keeps the garment smelling fresher longer.
